

Green Stormwater Infrastructure Workshop

Save the Date: January 30, 2019

**Environmental Protection
and Growth Management
Department**

**Environmental Planning
and Community Resilience
Division**

115 S Andrews Ave,
Room 329-H
Fort Lauderdale, Florida 33301

Broward County will be hosting a day-long workshop in order to inform about Green Stormwater Infrastructure initiatives, identify partnership opportunities, and plan future efforts, including flood resilience strategies.

This workshop, geared towards government, industry and academia, will provide attendees with an understanding of integrated planning approaches and design solutions to consider.

More details and registration information to follow.
